## President's Report By Bob Smith

We just finished celebrating Veteran's Day and I always celebrate the day before which is November 10, the Marine Corps Birthday. This year it was the 240<sup>th</sup> so I proceeded down to my local Albertsons supermarket to pick up some red, white, and blue cupcakes, only to find that there were none. Not even cookies or cakes decorated for Veteran's Day. I left empty handed and proceeded to Stater Brothers to check out their bakery selection of red, white, and blue cupcakes and found only one cake with white frosting and red trim. I asked the girl behind the bakery counter if they made anything to celebrate Veteran's Day and she kind of looked at me funny. I think that school and government employees knew it was Veteran's Day only because they got the day off.

What a shame our society has become. It is not everyone; we do have quite a few out there that respect and honor those that serve and have served our country to protect our freedom.

*"Honor to the soldier and sailor everywhere, who bravely bears his country's cause. Honor, also, to the citizen who cares for his brother in the field and serves, as he best can, the same cause."*  
Abraham Lincoln

*"The willingness with which our young people are likely to serve in any war no matter how justified, shall be directly proportional to how they perceive veterans of early wars were treated and appreciated by our nation."* George Washington

## Upcoming Event By Roger Hahn

### Larry Madole's Winter Bash January 9, 2016, 8:00 am till 1:00 pm

This is our next event, and it is a good one. Since we have no other events or shows planned, this will give us all ample time—to dig around through our garages and workshops to find items to donate to the silent auction. Look for all those projects you are never going to get around to accomplishing and donate them to the auction so WAPA can make some extra funds. The auction is also a good place to find something that is of interest to you; remember, "one person's junk is another person's treasure." You can also bring items to sell on your own. Coffee, donuts and lunch will be served; you can even stand around an old diesel fueled smudge pot to stay warm.

I am already starting to gather dates for next year's shows. So if you know of an event which we have not participated in and you think it would be appropriate for WAPA to participate, let me know the details.

**Riverside Airport Show, by Merle Morse**  
Mark your calendars: April 2, 2016.

# Flabob 2015

By Bob Smith

Once again this show was a huge success. There was plenty to see and do and eat. WAPA had a great turnout and everything seemed to go well with the engines and tractors. At around 2:30 there was a tractor parade which WAPA and the High Desert folks participated in. This was our last show for the year and we went out with a bang as Leroy fired his cannon.

Thank you all for a great show year. Let's see what Roger has in store for us next year.

## December Birthdays

**HAPPY BIRTHDAY!**

## WAPA History wanted, second request By Ron Haskell

Last month I asked for anyone with history of WAPA's struggle to get property and a museum to send me information. No one contacted me, have we lost the history of the events already?

Please contact me at 951-233-0551 or [rdhaskell@juno.com](mailto:rdhaskell@juno.com) if you have a memory of our pursuits.  
Thank you, Ron

Leroy, Lance and Paul

### **Look for the Obvious By Bob Smith**

It was Monday morning after the Cal Poly Pumpkin Festival and we were preparing to move the tractors back to the tractor shop. We prepared the John Deere D for starting by turning on the gas, turning on the kill switch, opening the compression releases on both cylinders, and setting to full choke. I pulled the flywheel over a few times and it started. I closed the compression release on cylinder 1 and went around to close cylinder 2 and noticed it was not firing through the petcock. Don Young drove it back to the tractor show on one cylinder and we planned for the following weekend to work on it. We started by removing number 2 spark plug and found it was wet. We checked the compression and found there was no problem with stuck valves. We put the spark plug back in and held the wire a gap from the plug to check for a spark. There was no spark. Leroy followed the wire back to the magneto and found that someone had pulled the wire out while it was over at the show. We inserted the wire and started the tractor and let it run for a few minutes to make sure everything was operating properly.

**Safety is our number one priority.**  
**By Don Young**

Loading and Unloading

**RAMPS:** Correct length, width and weight for the equipment that you will be loading and unloading. Secured so they will not slip or tip.

**WINCH:** Check before use, cable, hook, securely mounted to the truck or trailer. Do not exceed the capacity of the winch, three full turns of cable on the drum, do not use the winch to secure the load, stand clear, keep spectators away, wear gloves, place a heavy blanket on the cable to help prevent whiplash in case the cable breaks, never attach the hook back onto the cable, a safety chain attached to the load and to the trailer in case of winch failure, never place the cable on top of the drum. Use a shackle or strap at the anchor point.

**TRACTORS:** Allow them to warm up before driving up the ramps. Many accidents happen when the tractor is not running well, then, partially up the ramps it suddenly runs well and flips over backwards.

**NEVER GIVE SAFETY A DAY OFF!**
